

CELEBRITY STYLE

Stylist to the stars Anya Sarre reports on Hollywood's hottest wedding trends.

Style Tip: Pick an element from nature and use it throughout your theme; wood, leaves, and branches all make great wedding motifs that also create unique design details.

Create your own version of an enchanted forest like the medieval, fairy-tale-themed wedding of founding Facebook president Sean Parker. The groom and his bride Alexandra Lenas chose Big Sur as the location for their dreamy nuptials. Make your guests feel like they are in a faraway land by using a color palette of earth tones, pops of rich burgundy and purple, and accents of wood and leather. These elements will help to create a magical setting for your special day, in any location.

Anya's Advice:

Take your wedding theme to the next level by requesting that your guests dress-up accordingly. By having your attendees all dress in a certain color or type of outfit, they instantly become part of your décor.

Cuff of gilt metal and poured glass, \$2,475 by Chanel; budhagirl.com

Anya's Advice:

You can never go wrong with a lace-sleeved wedding dress. This feminine, classic style provides coverage while staying on-trend.

Style Tip:

Don't be afraid to wear wrist jewelry with a long-sleeved wedding gown. Have your sleeves hemmed up a little shorter so that you can wear a great statement cuff or bracelet.
